

CONCUSSION BASELINE TESTING

WHAT IS IMPACT TESTING?

Impact testing is the preseason physical of the brain. The purpose of testing is to store a baseline of cognitive function. It is a test that has become a standard tool used in comprehensive clinical management of concussions for athletes of all ages.

HOW DOES IMPACT TESTING WORK?

Impact takes approximately 20 minutes to complete. The program measures multiple aspects of cognitive functioning in athletes, including:

- Attention span
- Working memory
- Sustained and selective attention time
- Response variability
- Non-verbal problem solving
- Reaction time
